Subject: Re: Duty Day Proposal

Hi Tim,

We received great feedback from the advisory committee. Dan will forward to meeting minutes. They did vote to make the Technology in Humanities course a required course. They all are in full support of Security and the industry representatives were in support of offering all of the Cisco courses - not sure how to handle that issue.

Will provide more detail when we get together.

Thank you,

Janet Johnson

Dan, Randy, and Janet,

I am sending my Duty Day proposal. Essentially I am looking for time to organize how we will make decision concerning the Network Administration and Security program. Given the distance between Wadena and Moorhead, I think it would be good to work out some procedures so we all understand what is happening.

Part of the process is coordinating recommendations from the advisory committees. Meeting the needs of both communities is a interesting exercise.

Let me know what you think

Thank you,

Tim
