Select the MyACM button/tab to login.

Association for Computing Machinery

Advancing Computing as a Science & Profession

We see a world where computing helps solve tomorrow's problems – where we use our knowledge and skills to advance the profession and make a positive impact.

AWARDS & RECOGNITION

Ian Foster Recognized with Ken Kennedy Award

Ian Foster, a Professor at the University of Chicago and Division Director at Argonne National Laboratory, has been named the recipient of the 2022 ACM-IEEE CS Ken Kennedy Award. The Ken Kennedy Award recognizes pathbreaking achievements in parallel (high-performance) computing. Foster is cited for contributions to programming and productivity in computing via the establishment of new programming models and foundational science services. The award will be formally presented to Foster in November at The International Conference for High-Performance Computing.

myACM At a Glance

Use myACM to tell us how to customize information flow to you. You can log in using your ACM Web Account to set your contact information, manage your email forwarding and spam filtering preferences, and review your services. Other capabilities include defining your technical profile and setting your subscriptions to ACM lists.

Anyone can access myACM, though certain functions are available only to members and subscribers.

ACM at a Glance

- Nearly **110,000** Members from **190** Countries
- 170+** Technical Conferences, Workshops and Symposia
- 38** Special Interest Groups
- 1079** Professional and Student Chapters
- 66** Computing Journals
- 7** Magazines

Spotlight on Turing Laureates

The ACM A.M. Turing Award, computing's most prestigious honor, acknowledges individuals who have made lasting and major contributions to the field. Here, we look back at some of these technologies and breakthroughs that continue to impact our lives, and the remarkable innovators who helped shape them.

Public Policy Issues

Daily headlines about cybersecurity, encryption, artificial intelligence, drones, and a host of other issues, underscore the growing and complicated relationship between computing and public policy. ACM recently formed the [ACM Technology Policy Council \(TPC\)](#) to oversee its technology policy efforts globally. With the goal of fostering enlightened policies, [ACM's US Technology Policy Committee \(USTPC\)](#) and [Europe Technology Policy Committee \(Europe TPC\)](#) work with the TPC in their respective regions to provide technical expertise for policymakers, the computing community and the public.

ACM BYTECAST

Listen to ACM ByteCast!

ACM ByteCast is a podcast series from ACM's Practitioner Board in which hosts Rashmi Mohan, Bruke Kifle, and Scott Hanselman interview researchers, practitioners, and innovators who are at the intersection of computing research and practice. In each monthly episode, guests will share their experiences, the lessons they've learned, and their own visions for the future of computing.
