Map Network Drive

What network folder would you like to map?

Specify the drive letter for the connection and the folder that you want to connect to:

Drive: P:

Folder: \\chile\zenonapps Browse...

Example: \\server\share

Reconnect at logon

Connect using different credentials

Connect to a Web site that you can use to store your documents and pictures.

Finish Cancel

The example is mapping to the server Chile. Since the example uses the zenor organizational unit, the share name is zenonapps. Your share name would be your ou and apps as one word.

Since this is not a domain member, the example needs different credentials.
